“ My wife’s Uncle, which I believes makes him my Uncle-in-law, was a man of few words, unless you got him talking about space technology or beekeeping. While I was not able to speak in depth about his passion for the health and well being of the little honey making buggers, as a fellow space systems specialist, I was able to engage him in incredibly cutting edge discussions about space science and communications. During these chats, I realized Walter Wright had an incredible intellect. He perhaps was not a master of the social graces, but his intelligence reached the stars and beyond. Rest in peace Uncle Walt. The heavens are your playground now.
